📍 Khaja Colony, Kalburagi, karantaka

🎓 EDUCATION

Bachelor of Technology (B.Tech), Computer Science & Engineering Sharnbasva University, Kalaburagi

2027

Expected Graduation: 2027

High School (10th - SSLC) VTS High School, Kalaburagi

2020

completed:2020

Primary School (1st - 7th) Akkamahadevi Primary School, Kalaburagi

🧠 SKILLS

Programming

Python, C, Java, JavaScript

Web/Mobile

React, Flutter, Node.js

AI/ML

YOLOv8, PyTorch, TensorFlow, OpenCV

Tools

Git, Docker, Linux, VS Code

Soft Skills

Problem Solving, Teamwork, Adaptability

📄 PROFILE

Aspiring Computer Science Engineer currently in 3rd year at Sharnbasva University. Passionate about building web and mobile applications, exploring AI/ML models and AI agents, and applying modern technologies to solve real-world problems. Skilled in programming, problem-solving, and eager to contribute to innovative software and AI projects.

📁 WORK EXPERIENCE

Suraksha Netra - AI Video Surveillance System

2025 – PRESENT

- Developed an EO/IR based detection system capable of identifying fire, foreign objects, drones, and intrusions.
- Built six AI models (AgniDrishti, Margadarshi, Vihang Vetri, Shanka Soochi, Nirdeshak, SimhaRekha) using YOLOv8 and custom datasets.
- Deployed models on NVIDIA Jetson Orin/Xavier for offline real-time defense applications..

Web & Mobile Apps

2023 – 2024

- Designed React-based dashboards for real-time video processing.
- Built mobile apps with Flutter for object detection and alert notifications.
- Integrated LoRa communication for long-range offline alerts in defense use cases.

Mini Projects

- Portfolio Website
- CHatbot
- Basic Andriod App
